

## Final meeting in Siena

On **July 21 and 22, 2022**, the last meeting of the European SportSign project took place in **Siena (Italy)**

This meeting was a long-awaited meeting, since it was the second time, we had seen each other in person, due to **COVID**. As is well known by everyone, **COVID** made us all stop suddenly and rethink life, and of course work; and from this moment on, all the meetings we had were held online.

Also, due to the pandemic, the European project was extended for another year, which allowed us to reorganise all the work that you had organised to carry out in person.

And in the year 2022, everything began to return to the "old normality" and we were able to hold the face-to-face meeting, so longed for and loved by all the project presenters.

The meeting was led by the companions of the Siena School of Liberal Arts, where over 2 intense days, all the project partners worked hand in hand.

In this final meeting, a review of the entire project was made and all the documents that were pending to be finalised were finalised. Attached below is the program of the meeting.

## - Siena Meeting -
